

2022 Dedicated to Learning Summer School **Tentative Course Offerings at the WHS Campus**

Dedicated to Learning is pleased to offer the following courses for the coming 2022 Summer Session. All classes are held on the Walnut High School Campus. Online classes, while based at Walnut High School, are conducted exclusively (including exams) in a virtual learning environment utilizing the Canvas and/or Google Classroom course management platform. Hybrid courses that utilize the *Edgenuity* learning environment will have specific directions for completing the online learning modules and taking exams. These can be found in the course descriptions.

D2L courses are not filled as “first come first served.” **Any application submitted by the registration window deadline will be considered to allow families to choose which course is best for their student.** Our courses are available to both students within the WVUSD as well as from surrounding school districts, however only WVUSD students are allowed to register during the first registration window.

If you have any questions about a course, or if the course is right for you, please contact us (whs@dedicated2learning.org) or speak with you school site GLC / High School Academic Counselor for additional guidance.

Students can take a maximum of 1 “In-Seat” Course (10 Credits) AND 1 Online course (5 Credits). There is one exception - students who take online PE will be allowed to choose 5 or 10 credits in addition to their In-Seat Course.

Students are responsible for meeting course pre-requisites when completing the application process in order for enrollment to be valid. Students submitting *invalid* applications will be dropped from the course, **without a refund**. Course offerings may change prior to registration and courses may also be cancelled due to lack of enrollment. Please thoroughly review our 2021 Brochure for additional information prior to submitting your registration. Both the brochure and registration link will be available at www.dedicated2learning.org.

Please keep in mind that science and math courses are demanding and compress a full school year of material into a 6 week summer session. They require a substantial study time commitment outside of the school day. Students taking science or math courses for the first time (original credit) *should consider themselves to be strong in these areas*.

At the time of registration you will have the opportunity to select your 1st choice course and a 2nd choice. If there is a second class you would like to take if your first choice is not available, or if we are unable to place you, please enter it at the time of registration. Please only select a 2nd choice if you intend to take that course if awarded a spot.

***A \$20 science lab fee is included in the Tuition for Biology and Chemistry classes.**

Math Courses	Pre-Requisites	Credits	Tuition
ALGEBRA 1	Satisfies Alg. 1 State Diploma Requirement.	10	\$700
